

60cm or 24" FULLY INTEGRATED APPLIANCES | HC 1050 / HC 1001

Premium NoFrost

Liebherr's 24" NoFrost refrigerator-freezer for integrated use offers all the advantages you expect from a Liebherr product; state of the art technology and practical ideas that meet even the most stringent requirements. The GlassLine interior with satin finish glass and high quality stainless steel trim is a pleasure to behold every time you open the door. The storage shelves and racks are tough, scratch resistant and dishwasher safe. Liebherr's unique half-rack provides flexible space for tall bottles. The precise electronic control system makes it possible to control the refrigerator and freezer units separately. The two cooling units function independently of each other and guarantee the constant maintenance of temperatures set. This prevents food in the refrigerator unit from drying out. The freezer, with automatic IceMaker, is always free of ice thanks to professional Liebherr NoFrost technology. Liebherr appliances are ideal for integration into either American or European style kitchens, creating a uniform, clutter-free look. The door hinges can easily be moved to the opposite side, thanks to high quality workmanship. This model is also available without IceMaker.

LIEBHERR
A delight in freshness
