DEO 60 60CM BUILT-IN STAINLESS STEEL MULTI-FUNCTION DOUBLE OVEN WITH DOWNFOLD DOORS

When design purity achieves perfect results.

AEG ovens and cook tops have been designed to satisfy the demanding requirements of the North American family. All of the design and aesthetics normally acquainted with European design have been enveloped into the largest capacity 24" ovens available – 92 litres / 3.3 cu.ft..

Built to professional standards by experienced European appliance engineers taking advantage of the finest materials and specifications.

Robust, attractive appliances, destined to become classics that perform year after year.

The timeless beauty and legendary durability of stainless steel has established it as the preferred choice in the world's finest kitchens.

Every AEG appliance has been developed to perform to your highest expectations, in the most demanding of situations.

Superb performance

The styling of your AEG appliance will remain timeless. It is designed for years of trouble free performance and results.

Superior capacity, unlimited flexibility and evenness of cooking are AEG hallmarks.

All AEG appliances are designed to perfectly compliment each other.

Revolutionary *Steam Clean* Ovens

The steam cleaning process now available in the AEG oven is energy efficient compared to Pyrolytic cleaning and much safer as it is not using high temperatures to incinerate grime.
